SV College of Pharmacy, Etcherla, organized a Two week certificate program on Limit Test for 1stB.Pharm and 1st Pharm. D students by the Resource person. K. Pavitra. Limit test involves quantitative test to identify and control small quantities of impurity which is likely to be present in the substance and to determine the inorganic impurities present in the compound or substance. Totally 50 students participated in this training program and after the completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives:

1. Limit tests are designed to estimate the number of viable aerobic organisms present in pharmaceutical products and raw materials.
2. The limit testing of raw material as well as finished pharmaceutical products can help to determine whether the product complies with requirement of IP
3. The most care must be taken while performing Limit test so that contamination from outside can be avoided.

Program Outcomes:

1. well acquainted with the principles of limit tests.
2. Knowledge about the importance of limit tests.
3. Understand the types of limit tests
4. To evaluate the limit tests of inorganic compounds.
5. To understand the comparison of opalescence, turbidity, or color with fixed standard.

SV College of Pharmacy, Etcherla, organized a two week certificate program on Phytochemical Screening of Primary and Secondary Metabolites for 2ndB.Pharm and 2ndPharm. D students by the Resource person. B. Rama Devi. Phytochemical screening is one of the techniques to identify newsources of therapeutically and industrially important compounds like alkaloids, flavonoids, phenolics, steroids, tannins, saponins present in plant extract. This Program is carried out by using traditional phytochemical screening assays, chromatographic methods like HPLC and TLC as well as non-Chromatographic method like immunoassay. Totally 55 students participated in this training program and after the completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives:

1. To screen, Identify, extract and isolate the constituents.
2. Evaluate the therapeutic potential of the plant.
3. To develop phytochemical standards for the medicinal plant materials for quality

Program Outcomes:

1. To evaluate the phytochemical constituents.
2. Knowledge about pharmaceutical adjuvant of plant origin.
3. Know about the use of different solvents for phytochemical screening.
4. Well acquainted about the phytopharmacology of drugs.
5. Understand the concepts of phytochemical screening of different drugs.

SV College of Pharmacy, Etcherla, organized a Two week certificate program on "Anatomy of Reproductive System ". for 3rd B. Pharm and 3rd Pharm.D students by the Resource person. A.V.S.K. Bhavani. The human reproductive system includes the male reproductive system which functions to produce and deposit sperm; and the female reproductive system which functions to produce egg cells, and to protect and nourish the fetus until birth. Humans have a high level of sexual differentiation. In addition to differences in nearly every reproductive organ, there are numerous differences in typical secondary sex characteristics. Totally 60 students participated in this training program and after the completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives:

1. Identify the male and female reproductive organs.
2. List and label the parts of the male and female reproductive systems.
3. Summarize the reproductive processes for males and females.
4. Regarding the fertilization events

Program Outcomes:

1. General functions of male and female reproductive systems
2. Hormal control of reproductive systems
3. Process of oogenesis
4. Several methods of birth control
5. Gerenal symptoms of sexually transmitted infections

SV College of Pharmacy, Etcherla, organized a Two week certificate program on Pharmaceutical Method Validation and Cleaning Validation for 3rdB.Pharm and 3rdPharm.D students by the Resource person M.Madhuri. Method validation is used to confirm that the analytical procedure employed for a specific test is suitable for its intended use. Results from method validation can be used to judge the quality, reliability and consistency of analytical results. Cleaning validation is to prove that the equipment is consistently cleaning the product from detergent and microbial residues to an acceptable level. Totally 65 students participated in this training program and after the completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives:

1. Introduction of validation
2. Published guidelines
3. Types of analytical method to be validated and considerations prior to method validation.
4. Typical analytical performance characteristics used in method validation.
5. Scope of cleaning validation
6. Procedure and elements of cleaning validation
7. New challenges in cleaning validation.

Program Outcomes:

1. Concepts of calibration, qualification and validation.
