ABOUT COLLEGE

Sri Venkateswara College of pharmacy was established in 2004 by Vikas Educational Society, Etcherla, Srikakulam district. The objective of the college is to impart quality education to the students of rural areas. The college have the student community in their academic endeavour and extra-curricular activities. The Placement cell is active, opening the frontier of job opportunities. This college is committed to pursue excellence in all its disciplines and providing training to develop professional responsibility, Social sensitivity and cultural awareness. It also directs students through the path of truth and integrity. Our college is surrounded by the beauty of nature. The college offers B.Pharmacy, M.Pharmacy (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

COURSES OFFERED :

D.Pharm- 2years
B.Pharm-4 years
Pharm.D-6years
M.Pharm-2years

OBJECTIVES OF THE PROGRAMME

Hydrogels are hydrophilic, three-dimensional networks that are able to absorb large quantities of water or biological fluids, and thus have the potential to be used as prime candidates for biosensors, drug delivery vectors, and carries or matrices for cells in tissue engineering. Hence the present seminar focus on exploration of importance and applications of hydrogels

TOPICS COVERED

What Is Hydrogel
Why Is It Necessary
Biosensors
Conclusion

ABOUT COLLEGE

Sri Venkateswara College of pharmacy was established in 2004 by Vikas Educational Society, Etcherla, Srikakulam district. The objective of the college is to impart quality education to the students of rural areas. The college have the student community in their academic endeavour and extra-curricular activities. The Placement cell is active, opening the frontier of job opportunities. This college is committed to pursue excellence in all its disciplines and providing training to develop professional responsibility, Social sensitivity and cultural awareness. It also directs students through the path of truth and integrity. Our college is surrounded by the beauty of nature. The college offers B.Pharmacy, M.Pharmacy (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

COURSES OFFERED :

D.Pharm- 2years
B.Pharm-4 years
Pharm.D-6years
M.Pharm-2years

OBJECTIVES OF THE PROGRAMME

Polymers are most widely used in cancer treatment . The permeability and thickness of the polymer, the solubility and the release area of the drug determines the release kinetics of the dug form the diffusion controlled system. Silicone, cross-linked polyvinlyly alcohol, and ethyl vinyl acetate are mostly use in drug fomulations. These are used to minimize toxicity and side effects. Most of the materials used are biodegradable. Anticancer drugs are encapsulated by polymeric nanocarriers, which are known as nanomedicine.

TOPICS COVERED

Adout cancer
About nanoparticles
Types of Polymeric nanoparticles used in cancer treatment
Advanced methods
Application

The college offers B.Pharmacy, M.Pharmacy (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

COURSES OFFERED :

D.Pharm- 2years
B.Pharm-4 years
Pharm.D-6years
M.Pharm-2years

OBJECTIVES OF THE PROGRAMME

Green drugs are far superior to those manufactured with physical and chemical methods based on various aspects. For example green techniques eliminate the use of expensive chemicals, consume less energy, and generate environmentally benign products and by products. They are eco-friendly, convenient single-step method.

TOPICS COVERED

Phytopharmacology
Differences between green drug and synthetic drug
Major therapeutic categories in which herbal medicine were prescribed
Quality control of herbal medicine

ABOUT COLLEGE

Sri Venkateswara College of pharmacy was established in 2004 by Vikas Educational Society, Etcherla, Srikakulam district. The objective of the college is to impart quality education to the students of rural areas. The college have the student community in their academic endeavour and extra-curricular activities. The Placement cell is active, opening the frontier of job opportunities. This college is committed to pursue excellence in all its disciplines and providing training to develop professional responsibility, Social sensitivity and cultural awareness. It also directs students through the path of truth and integrity. Our college is surrounded by the beauty of nature. The college offers B.Pharmacy, M.Pharmacy (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

COURSES OFFERED :

D.Pharm- 2years
B.Pharm-4 years
Pharm.D-6years
M.Pharm-2years

OBJECTIVES OF THE PROGRAMME

Artificial Intelligence tools can improve the success rate of new drugs by performing quality control and ensuring high quality standards. As its core AI reads human behaviour to develop intelligent machines. Simply AI is to design a technology that enables computer systems to work intelligently yet independently. It can enhance preventive care and quality of life and accurate diagnosis.

TOPICS COVERED

Materials and method
AI in Pharmaceutical research
Why AI in pharma is a good idea
Applications of AI

ABOUT COLLEGE

Sri Venkateswara College of pharmacy was established in 2004 by Vikas Educational Society, Etcherla, Srikakulam district. The objective of the college is to impart quality education to the students of rural areas. The college have the student community in their academic endeavour and extra-curricular activities. The Placement cell is active, opening the frontier of job opportunities. This college is committed to pursue excellence in all its disciplines and providing training to develop professional responsibility, Social sensitivity and cultural awareness. It also directs students through the path of truth and integrity. Our college is surrounded by the beauty of nature. The college offers B.Pharmacy, M.Pharmacy (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

COURSES OFFERED :

D.Pharm- 2years
B.Pharm-4 years
Pharm.D-6years
M.Pharm-2years

OBJECTIVES OF THE PROGRAMME

The objective of quality assurance in clinical research is to prove the fitness of the product. It is also used to prevent mistakes and defects in the development and production of both manufactured products. It is very important in clinical research to ensure the data integrity. It facilitates continuous improvement in clinical research through internal audits , policy and procedure creation and support of corrective and preventive actions.

TOPICS COVERED

Quality assurance
Quality control
Impacts of ignorance
Components of QA
