Topics

1. Approaches of CADD in the pharmaceutical industry.
2. Drug Discovery and development process using CADD
3. Commonly used methods and various tools in Drug Design
4. Various types of CADD and software's used for drug design.

About programme

It is a one week offline faculty development programme. The programme aims to convey the information regarding computer aided drug design in current research work, which is helpful for faculty members to know the detailed information about computer aided drugs.

About College

Sri Venkateswara College of pharmacy was established in 2004 by Vikas Educational Society, Etcherla, Srikakulam district. The objective of the college is to impart quality education to the students of rural areas. The college have the student community in their academic endeavour and extra-curricular activities. The Placement cell is active, opening the frontier of job opportunities. This college is committed to pursue excellence in all its disciplines and providing training to develop professional responsibility, Social sensitivity and cultural awareness. It also directs students through the path of truth and integrity. Our college is surrounded by the beauty of nature. The college offers . B.Pharmacy, M.Pharmacy, (Pharmaceutical Analysis & Quality Assurance, Pharmaceutical Technology, Pharmacology) and Doctor of Pharmacy courses.

1)Computer-Aided Drug Design (CADD) strategies have become indispensable tools in modern drug discovery and development.

2)Computer-aided drug discovery (CADD) has become an essential part of several projects in different settings and research environment.

3)Besides academia, large and small-sized pharmaceutical and biotechnology companies have been using intelligent software to assist in the discovery or optimization of bioactive compounds.

PROGRAMME REPORT

Name of the programme: A one week Faculty Development programme on Computer Aided drug Design usage in Current Research work.

Date: 16-07-18 to 21-07-18

Details of the Resource person:

- **Name:** Dr.G. Suneetha
- **Designation:** Professor
- **Organization:** Dr Samuel George institute of pharmaceutical sciences
- **Email id:** yaparthis@gmail.com
- **Contact number:** 8919306758

Objective: Sri Venkateswara college of pharmacy had successfully organized A one week Faculty Development programme on computer aided drug design usage in current research work. The main objective of the programme is to discuss a variety of tools and techniques that assist in the various stages of drug design, thereby reducing cost of Drug research and development time.

Topics Covered:

1. Approaches of CADD in the pharmaceutical industry.
2. Drug Discovery and development process using CADD
3. Commonly used methods and various tools in Drug Design
4. Various types of CADD and software's used for drug design.

Outcome of the programme: Open feedback was collected from the faculty members and they convey that that the programme was extremely helpful for covering the topics related to information which is useful in pharmaceutical research laboratories at various stages of drug discovery.

Objectives of Programme

- The main objective of the programme is to discuss about quality control, quality management and statistical quality control.
- Six sigma is a process which is a combination of 4Ms that is man, machine, materials and methods for producing products or services which meets customer's expectation these are evaluated by statistical methods and must have inhere.
- Six Sigma was developed based on preceding Quality Management concepts such as Total Quality Improvement, Quality Control and Zero Defects.

Objective: Sri Venkateshwara college of pharmacy had successfully organized A one week Faculty Development programme on An Overview regarding Six Sigma. The main objective of the programme is to discuss about quality control, quality management and statistical quality control.

Topics Covered:

1. It focusing on meeting customer requirements, improving customer retention, and improving and sustaining business products and services.
2. The two main six sigma methodologies DMAIC (Data- driven method) and DMADV (define, measure, analyse, design, validate) were discussed in detail.
3. Different techniques of six sigma were discussed.

Outcome of the programme:

Open feedback was collected from the faculty members and they convey that that the programme was extremely helpful for covering the topics related to information which is useful for an approach for pharmaceutical manufacturing quality in pharmaceutical industry.
