Report on Clean and green campus initiatives

1. No vehicle day
2. Restricted entry of automobiles
3. Environmental Conservation
4. Landscaping with trees and plants

I. No vehicle day:

Every Thursday is a "no vehicle" day, during which we strictly enforce the ban on vehicles entering the campus.

A renowned educational facility called SVCP located in the busy city's core, has started a praiseworthy "No Vehicle Day" environmental initiative to motivate its academic members to cut carbon dioxide emissions. Every Tuesday, as part of this program, people will use the bus instead of driving their own cars or bikes to work. The SVCP seeks to improve safety, security, and fuel efficiency while reducing traffic congestion and air pollution in the city by encouraging the use of public transportation.

In conclusion, the SVCP "No Vehicle Day" campaign is a commendable project designed to encourage eco-friendly commuting habits and lower carbon dioxide emissions. SVCP is setting an example and proving its dedication to building a more sustainable future by encouraging faculty members to take public transit and by offering designated parking places for those who wish to drive to work.

II. Restricted entry of automobiles:

The college operates a transport 21 of buses covering the surroundings 60km area of Srikakulam to the college to facilitate the students and faculty. the institution encourages the staff and students to use the college transport instead of their vehicles for safety and security, the college buses are checked for pollution by the authorized agency.

A policy that restricts vehicular access to SVCP's campus grounds has been put in place. This rule is intended to make sure that only cars owned by college employees and students are permitted admission while other cars are forbidden from entering the campus. By reducing the number of vehicles on campus, this action is being taken to lessen the institution's carbon impact and safeguard the environment.

III. Environmental conservation:

World Environment Day was celebrated on 5th June 2018. It is to raise awareness about environmental issues, the increasingly deteriorating conditions for the environment, climate change, etc., Students exhibited skits on environmental protection and pollution control. The principal addressed students to use nature-friendly materials and to love our mother nature, and as responsible citizens, each and everyone should take steps to protect our environment.

The Swachh Bharat Abhiyan, Clean and Green programmes, Environment Day celebrations, and energy saving campaigns on and around the campus were all organised and carried out in large part by volunteers from the National Service Scheme (NSS). These volunteers gave their all to promote environmental protection and foster sustainable behaviours among college students.

SVCP, showed its everlasting dedication to environmental preservation and sustainability by implementing these steps and efforts. The organisation understood the value of working together to conserve the environment and spur positive social change. In the struggle against environmental deterioration and pollution, SVCP serves as an example and a source of inspiration for other educational institutions and organizations.

IV. Landscaping with trees and plants:

It is worthwhile to view the aesthetic-reflecting institute landscape. Trees and lawns offer shade and beautify the environment. The site is covered in trees and plants to remove pollutants from the air and safeguard the well-being of everyone. In both development and maintenance, much attention is taken. The campus's green spaces are created and maintained by the institute's greenery department. The campus's aesthetic appeal is improved by the trees and plants, which also provide several environmental advantages like air purification, carbon sequestration, and temperature regulation.

The college places particular attention on growing medicinal plants, acknowledging their significant impact on the environment and healthcare. For the annual plantation campaign, the college's well-established nursery provides a variety of plants and saplings, including medicinal herbs. The college fully exploits this

NSS volunteers assist in planting the saplings both within and outside of the facility. exterior to the campus

Along with growing medicinal plants, the SVCP aims to improve the campus's aesthetic appeal by planting a range of fruit trees, including banana, mango, lemon, water apple, sours of grapes, and pomegranate. These initiatives have produced a dynamic and lively campus atmosphere that encourages a sense of community and well-being.

SVCP significantly contributes to environmental sustainability and conservation by supporting the planting of fruit trees, blooming plants, and medicinal plants. The college is dedicated to keeping the campus a healthy and exciting environment to work and learn because it recognises the significant role that green spaces play in the wellbeing of both employees and students.
